Intravenous Infusion Rates for treprostinil concentration 50,000 ng/mL

(**50,000 ng/mL** = 5,000,000 ng treprostinil in 100 mL)

Fill in the weight (kg) and calculate the INFUSION RATE (mL/hour) = [weight (kg) x rate (mL/kg/hour)]

Dose (ng/kg/minute)	rate(mL/kg/hour)	weight (kg)	INFUSION RATE (mL/hour)
