

COMMON FUNGI OF MEDICAL IMPORTANCE

1. **Yeasts:** Caution – are common members of normal flora as well as a cause of invasive disease
 - a. *Candida* species:
 - C. albicans*
 - C. glabrata*
 - C. krusei*
 - C. parapsilosis*
 - C. tropicalis*
 - C. lusitaniae*
 - b. *Cryptococci*
 - C. neoformans* var *grubii*
 - C. neoformans* var *gattii*
 - c. *Trichosporon* species

2. **Molds:** Caution – are common contaminants as well as cause of invasive disease
 - a. *Aspergillus*
 - A. fumigatus*
 - A. flavus*
 - A. terreus*
 - b. *Fusarium*
 - c. *Scedosporium apiospermum* (*Pseudallescheria boydii*)
 - d. Zygomycetes (*Rhizopus*, *Mucor*, Others)

3. **Dimorphic Fungi**
 - a. *Blastomyces*
 - b. *Coccidioides*
 - c. *Histoplasma*
